

CASE STUDIES

THE CHALLENGE:

The European commission intends to speed up and digitize its process of validating identity and signing internal documents in a safe and legal way.

THE SOLUTION:

Using the **IDcert** e **SigningDesk** solution, a signature portal (EUSign) was developed, allowing CE employees to use **Remote Qualified Signatures** to sign contracts and other documents, **supported by an identity validation process through videoconferencing**.

THE RESULT:

CE employees have access to a remote validation process in accordance with Reg. eIDAS provided by DigitalSign, allowing them to quickly issue a Qualified Digital certificate and then be able to sign, at any time and anywhere, critical documents from this organization. completely safe way.

The document signing cycle was reduced from weeks to minutes and paper consumption was also drastically reduced.

Today also marks the first time the @EU_Commission used an e-signature for an agreement. It was simple, secure and a huge leap forward in our work to become a fully #digital @EU_Commission by 2024 #digitaleurope #egovernment
